Idea:

Idea:

Think: Rolly is using the area model to solve homework from his class. His work is shown.

Handwritten work showing the area model for 37×5 . The area model is a large rectangle divided into two parts. The top part is labeled 30 above it and $5 \times 30 = 150$ inside. The bottom part is labeled 7 above it and $5 \times 7 = 30$ inside. To the right of the rectangle, the numbers 150 , 30 , and 180 are written vertically, with a plus sign between 150 and 30 , and a horizontal line above 180 .

Tell Rolly whether his work is correct or not.
Explain what he should do differently if he has any mistakes.
